

Movement flow,  
never get dirty.

**Lyophilized Saveroller Engobes,  
ideal for large tiles.**

## Lyophilized Saveroller Engobes, ideal for large tiles.

The **Premium Saveroller Engobes** made and distributed by KESER ITALIA are available in various formulations. They **can be made to specific customer requirements**. In the lyophilized version too, they protect surfaces from the possible **formation of deposits and scale**.

Ideal for application with silicone rollers, they are indispensable for large tiles.

### Principle:

- applied on backside tiles they favour flow on kiln rollers.

### Primary properties:

- the lyophilized version is more practical and effective on large-surface tiles and ensures perfect application.

### Benefits:

- increased productivity;
- cleaner rollers;
- more simplified packaging management.

## Movement flow, without ever stopping.

### Premium Engobes are the perfect system for applying to large tiles made of:

- ceramic,
- porcelain,
- granite.

### Lyophilized Saveroller Engobes by Keser Italia:

- recommended by high-profile customers,
- certified by leading European institutes,
- they protect ceramic rollers, including with large tiles.
